

Supplier Performance Risk System

**Industrial Capabilities
Questionnaire, DD Form 2737
Tutorial**

The Naval Sea Systems Command (NAVSEA), in collaboration with the Direct Reporting Program Manager for Maritime Industrial Base Program Office (DRPM-MIB), collects information on U.S. shipbuilders, ship repair yards, and suppliers through various surveys. The Navy uses survey information to assess the capability and health of the shipbuilding industrial base, evaluate future shipbuilding programs, and steer facility and workforce investments, among other uses. Participation in these surveys is voluntary and provided information will be used strictly for Government purposes. Participation in a survey shall not be construed as a contract, a promise to a future contract, or a commitment of any kind by the Government. Non-participation in a survey will not disqualify nor have an impact on evaluation of future solicitations.

The DD Form 2737, Industrial Capabilities Questionnaire (OMB no. 0704-0377), is intended for suppliers of components and equipment on naval vessels. Examples include engines, propellers, generators, A/C plants, steel, piping, doors, and anchors. Suppliers of Government-furnished sensors, weapons, and information systems are also eligible. Key information is requested for employment, production facilities, Government workload percentage, and item-specific National Stock Number (NSN) information. Secondary information is requested for production capacity and surge capabilities.

(2) LIST THOSE INDIVIDUAL PROCESSES AND/OR GROUP OF FACILITY WORK STATIONS, PRODUCTION EQUIPMENT, TEST EQUIPMENT, AND TOOLING MOST ESSENTIAL TO PRODUCING THIS ITEM. INCLUDE THE NORMAL LEAD TIME AND ESTIMATED COST FOR ACQUIRING EACH OF THESE PRODUCTION RESOURCES.

Add New	
+/-	Processes/Equipment
No records available.	

MOST CRITICAL TO PRODUCING THIS ITEM

2. TIME AND COST CONSTRAINTS

▼ Details

Provide time and cost to reach surge requirements in part 1 of section IV within your production facilities and supply chain. Provide time and cost for entire supply chain. For your facilities and supply chain list what factors limit production (i.e., production equipment, test, tooling, skilled labor, etc.). Include all that apply. Provide what is the longest length of time you and your supply chain can operate the surge production rate, and any further explanation as to what constrains the capability to surge production.

What is the time and cost to reach the surge production rate within the following areas?

Area	Time to reach surge production rate	Cost to reach surge production rate
Production facilities		
Supply chain
